Giorgio Sacerdoti Award 2007 Knowledge Management Project

AICA (Italia Association for Informatics and Automatic Calculus), Catholic University of Milan and Applied-Science Faculties of Milan Foundation have started up a three-year research project called PKM 360° dedicated to the Knowledge Management.

Fontana Pietro s.p.a. has been selected among **55 companies** supporting the initiative to present its experience in management and development of Knowledge Management projects. To the commission has been submitted the summary of the project that has been involving every Fontana Group branch for the last three years:

**“Integrated Design System Guided by Sets of Rules,
concerning Sheet Metal Dies”**

Fontana Pietro s.p.a., along with ENI and Irix, is awarded with “PKM360° Giorgio Sacerdoti Award 2007 edition” for the following reason:

“Middle size company, has developed – also in cooperation with Universities – excellence projects in the field of knowledge management that have been applied in practice in the company organization and productivity increase”

PKM360° Award Giorgio Sacerdoti

Ing. Morreale, Corporate Research & Development Manager, receives the award at the Catholic University of Sacred Heart, Milan.

The developed system, called **FP-System**, is an instrument for knowledge management and sharing in the design and manufacturing industry. FP-System has been designed by adopting an approach based on acquisition, representation and formalization of the know-how and processes Fontana Pietro s.p.a. has been improving for years of experience and success.

This allows a **more efficient access to the information, design and manufacturing time reduction, makes new staff integration easier and allows cooperation among different culture and nationality personnel.**

For the project development, our Research & Development department has cooperated with the **Knowledge Laboratory of the University Milan Bicocca** and the **Department of Mechanical Technology of Applied-Science Faculties of Milan.**

The thanks is owed to **all the staff** for the commitment and the efforts devoted to turn the change into a growing up chance, necessary for a positive response to the changes of the world-wide market where Fontana Group works.
