February 9<sup>th</sup> 2005

## **Fontana Pietro SpA R&S and the relationship with Universities**

Premise: this is an internal communication of Fontana Fontana SpA, published on the website Courtesy of the Company.

Good morning everybody,

Next Friday February 11th 2005 the R&S department annexed to Fontana Pietro SpA shall be inaugurated through an official ceremony in collaboration with the Department of Mechanical Technology in the University of Palermo.

We will take part to the ceremony together with very few other entrepreneurs invited by us as a delegation of important companies of the Lecco district cultivating relationships of acquaintance and friendship with our Company and our stock-holders.

The aim is to facilitate the development of other small and medium companies, which are typical of the Italian industrial net and particularly active in the Lecco area.

The event, which shall be held in front of Magnifico Rettore dell'Università degli Studi di Palermo, will see the participation of Sicilian authorities and companies as per brochure enclosed.

Best regards.

FONTANA PIETRO S.P.A.

Walter Fontana

President Chairman & C.E.O.
